

# Dyontai Staton

Self Taught & Self Motivated

---

## Introduction

I am **Dyontai Staton**, an engineer since the age of 12. At that age I was developing 2D platform games with C# just to have something of my own to play with my brothers. At the age of 15 I entered the realm of **E-Commerce** and **Web Development**. From that point I started developing & producing numerous eCommerce sites for clients through various freelance contracts. At 16 I had assembled a team of developers to service **Large & Small Businesses** creating, and managing their **Online Presence**.

I've done everything from **Designing Sites** through Figma to **Cloud Deployment** of node applications. I'm known for doing the impossible... and then doing it the next day just because I want to 😊

## Skills

- Experience: **FullStack** Development since 2016 & Lead Developer @ **Staton Web Development**
  - Languages: **Javascript**, HTML, CSS, Python, SQL, PHP, C#
  - Incorporate **AGILE / SCRUM** Development Process
  - **Certified** Lead Developer / Programmer With **Professional Recognition**
  - **Managed** Numerous **High Price** Development Contracts
  - **Automated Testing** With Debugging & Analysis
  - **Ability To Train** Development Concepts
  - **User Requirement** Gathering
  - All Skills were **Self-taught** & Gained From Working With Professional Clients
